Country dashboard

Baseline	Average value of the country in 2013–2017
National projection	This is the projected value for the specified year if the country continues at historical progress rates, conditional on each year's projected value.
Feasible benchmark	This is the projected value for the specified year if the country progress rate accelerates to match the progress rates of the top third of fastest improving countries, conditional on each year's projected value. This value is also the proposed benchmark for discussion.
National benchmark (to be determined)	This is a benchmark to be set by each country.
Minimum regional benchmark	This is the average of the country feasible benchmarks for the lowest tercile of countries in the region.

Regional dashboard

Baseline, projections and benchmarks	Their values are averages weighted by the school-age population.
