SDG 4 Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all

METADATA

Target 4.c By 2030, substantially increase the supply of qualified teachers, including through international cooperation for teacher training in developing countries, especially least developed countries and small island developing States

4.c.1 Proportion of teachers with the minimum required qualifications, by education level

Definition
Percentage of teachers by level of education taught (pre-primary, primary, lower secondary and upper secondary education) who have received at least the minimum organized pedagogical teacher training pre-service and in-service required for teaching at the relevant level in a given country, in a given academic year. Ideally the indicator should be calculated separately for public and private institutions.

Purpose
Teachers play a key role in ensuring the quality of education provided. Ideally all teachers should receive adequate, appropriate and relevant pedagogical training to teach at the chosen level of education and be academically well-qualified in the subject(s) they are expected to teach. This indicator measures the share of the teaching workforce which is pedagogically well-trained.

Calculation method
The number of teachers in a given level of education, in a given academic year who are trained is expressed as a percentage of all teachers in that level of education, in that academic year.

---

1 Note: Refinement of the indicator name approved by the Inter-agency and Expert Group on SDG Indicators (IAEG-SDGs) on 13 March and 2 April 2020. Final approval pending the 52nd session of the Statistical Commission in March 2021.
\[ PTT_{n,t} = \frac{TT_{n,t}}{T_n} \]

where:

\( PTT_{n,t} \) = percentage of trained teachers at level \( n \) of education in year \( t \)
\( TT_{n,t} \) = trained teachers at level \( n \) of education in year \( t \)
\( T_n \) = total teachers at level \( n \) of education in year \( t \)

\( n \) = 02 (pre-primary), 1 (primary), 2 (lower secondary), 3 (upper secondary) and 23 (secondary)

**Interpretation**
A high value indicates that most students are being taught by teachers who are pedagogically well-trained to teach.

**Type of data source**
Administrative data.

**Disaggregation**
By sex and by level of education. Location is not currently collected at the global level but this could be considered in the future.

**Data required**
Number of teachers at each level of education who are trained and total number of teachers at each level in a given academic year.

**Data sources**
Administrative data from schools and other organized learning centres.

**Quality assurance**
The indicator should be based on available data on trained teachers for the given level of education, from all types of educational institutions in the country (public and private). The UIS sets standards and maintains the global database used to produce this indicator.

**Limitations and comments**
National minimum training requirements can vary widely from one country to the next. This variability between countries lessens the usefulness of global tracking because the indicator would only show the percent reaching national standards, not whether teachers in different countries have similar levels of training. To address this limitation, the UIS has initiated in 2019 the development of an international classification of teacher training programmes that can be used for comparisons of such programmes across countries.
