# Mapping regional education monitoring, reporting and benchmarking mechanisms

TCG Fifth Meeting  
15-16 November 2018  
Mexico City, Mexico  
**TCG5/ REF/14**

The paper was prepared by UNESCO Institute for Statistics and Global Education Monitoring Report, Co-chairs of the SDG-Education 2030 Steering Committee Review, Monitoring and Reporting Working Group, for the 4<sup>th</sup> meeting of the Steering Committee in February 2018.

# Ref doc 1 - Mapping regional education monitoring, reporting and benchmarking mechanisms

## Background and objective

A session at the June 2017 meeting of the SDG–Education 2030 Steering Committee examined the role of regional organizations as potential peer learning mechanisms for countries to exchange information on their education policies and systems. The background paper to the session showed that almost all regions in the world have established entities that allow countries to share information on education and learn from each other (GEMR, 2017). But the background paper also concluded that strengthening policy dialogue and peer learning mechanisms at the regional level required, among other, the following:

- a regional education strategy, with clear priorities, targets, resources and monitoring frameworks;
- the alignment of regional education strategies with the global education strategy, represented by SDG 4 and the Education 2030 Framework for Action, with regional perspectives for how SDG 4 targets will be achieved; and
- the alignment of regional and global education targets and monitoring frameworks through a process to be facilitated by UNESCO regional offices and the UNESCO Institute for Statistics.

The background paper called for a mapping of regional and sub-regional strategies, targets and monitoring frameworks. Accordingly, the Steering Committee requested its Review, Monitoring and Reporting Working Group to produce such a mapping of education strategies and agendas, focusing on their:

- monitoring frameworks
- reporting mechanisms (against the strategy and/or the monitoring framework); and
- benchmarking and threshold setting processes

This note presents the main findings of this mapping exercise. As the number of organizations with explicit education monitoring frameworks is limited, the level of alignment of the regional education monitoring frameworks with the Education 2030 Agenda is not analysed here. Several of those regional education strategies have gone or are going through a process of alignment of that type, which is expected to have a positive impact on coordination between the regional and the global levels, as well as on the possibility that an increasing number of regional education strategies will develop their monitoring frameworks and reporting mechanisms.

## Regional education strategies and their monitoring and reporting frameworks

Education is a central theme throughout the 2030 Agenda, which includes SDG 4 on education, education-related targets within seven other SDGs, and education implications for all SDGs. In particular, SDG 4 is ambitious and aims to “ensure inclusive and equitable quality education and promote life-long learning opportunities for all” by 2030. The goal consists of ten targets to guide countries along a transformative path to a sustainable education agenda (UIS, 2017).

However, the SDG agenda is not the only cross-national one to which countries are committed. Different regions and sub-regions have reached agreements on certain goals and targets even before the approval of the SDGs. The existence of these other cross-national commitments requires coordination of the implementation processes if the priorities are to be achieved efficiently without duplication of effort.

A crucial step is setting a monitoring mechanism to help with the identification of advances and difficulties in the implementation of these education strategies. Table 1 presents the summary results of an information collection process. Additional information with links to selected documents is

available in the annex. *The information is not complete and has not been fully validated, but the aim of this note is precisely to generate interest and update the data.*

| Organization for Economic Cooperation and Development (OECD)       | –                                                                                              | (...)                     | Yes                                       | No                                             |

The main findings of this mapping exercise are the following:

- Several – though not all – regional organizations with an education mandate have education strategies or plans in place. Many are being influenced strongly by SDG 4 and aim to align with it.
- Many organizations have (or are in the process of developing) a monitoring framework although few report against the implementation of their education strategies using the monitoring framework. In some cases, such as the Commonwealth and the OECD, there is an education monitoring report but not linked to a time-bounded education strategy.
- Only one organization, the European Union, has defined benchmarks or minimum thresholds for the indicators in its regional education agenda. The OECD has also constructed a set of benchmarks for monitoring its Member States' progress towards SDG 4 targets but these are not linked to a specific regional agenda (Thapa, 2018).

In addition to regional education strategies, many regions also have processes in place to implement the Education 2030 Agenda regionally, which may result in region-specific monitoring frameworks. UNESCO coordinates these processes through the leadership of its Regional Bureaus for Education<sup>1</sup>.

<sup>1</sup> Arab States, Regional Arab SDG4/Education 2030 Support Group; Asia and the Pacific, Regional Network of National Coordinators for SDG4-Education 2030; Latin America and the Caribbean, the Technical Group for SDG 4 – E2030 Implementation Roadmap for Latin America and the Caribbean; West and Central Africa, Regional Coordination Group on SDG4-Education 2030 in West and Central Africa (RCG4-WCA)

## Recommendations

On the basis of these findings, the following recommendations can be made:

- All regional organizations with an education mandate and an education strategy with clear goals would benefit from a **monitoring framework** and a regular **report** informing on progress in its implementation.
- For those organizations seeking to build an education monitoring framework, the **SDG 4 Thematic Indicator Framework** provides important guidance for building a regional set of indicators. Regional discussions will be facilitated by indicator definitions agreed at global level through the Technical Cooperation Group on the Indicators for SDG 4 – Education 2030. The UIS can help to facilitate those processes based on its experience at national, regional and global levels.
- The possibilities of **cooperation between organizations at the global and regional level** for data collection to serve the monitoring frameworks needs to be explored. This should be approached on a case by case basis considering the existence already of several mechanisms of cooperation for data production and exchange (e.g. UNESCO/OECD/Eurostat education statistics framework).
- Coordination between the global and regional monitoring mechanisms for the Education 2030 agenda is important. **SDG 4-specific mechanisms** being developed in the regions, led by UNESCO, are very important and should rely on the SDG 4 Thematic Indicator Framework as much as possible before the necessary modifications and adaptations required to address regional contexts.
- Custodian agencies of SDG 4 indicators should be more present in the **governance structures of regional monitoring mechanisms** to help increase coordination between regional and global levels.
- Some regional organizations need support to strengthen their **capacity to report** against the implementation of their education strategy and its monitoring framework. The experience of the Global Education Monitoring Report can provide useful guidance for how these organizations can report on their education progress.
- The experience of setting **benchmarks and thresholds** in the monitoring frameworks is limited to a few cases only, a situation that surely reflects the complexities of those processes involving both political and technical considerations. Although in principle the establishment of benchmarks can help policy makers to determine priorities for monitoring, more in depth analysis of these experiences are needed to determine if these mechanisms are making a difference when comparing with cases that have not set explicit benchmarks or targets.
