AND STATISTICS**

Measuring and monitoring learning outcomes and skills: what are the challenges going forward?

December 2023

Outline

- What indicators can be produced from Learning Assessments?
- What is the coverage of produced indicators?
- Questionnaires and data collected in CNAs
- Methodological challenges when reporting on SDG 4.1.1 and potential solutions
- Menu of alternatives for country reporting
- Agenda forward to work with Member States
- 2025 SDG Indicator framework revision

What indicators can be produced from Learning Assessments?

Indicator	Domain	Required definitions
4.1.1 Proportion of children and young people: (a) in grades 2/3; (b) at the end of primary; and (c) at the end of lower secondary achieving at least a minimum proficiency level in (i) reading and (ii) mathematics, by sex	Reading and mathematics	Reading and mathematics (content) Minimum proficiency level
4.4.2 Percentage of youth/adults who have achieved at least a minimum level of proficiency in digital literacy skills	Digital literacy skills	Digital literacy skills (content) Minimum level of proficiency
4.6.1 Percentage of population in a given age group achieving at least a fixed level of proficiency in functional (a) literacy and (b) numeracy skills, by sex	Literacy and numeracy	Functional numeracy and literacy (content) Fixed level
4.7.4 Percentage of students by age group (or education level) showing adequate understanding of issues relating to global citizenship and sustainability	Global citizenship and sustainability	Global citizenship and sustainability (content) Adequate understanding
4.7.5 Percentage of 15-year-old students showing proficiency in knowledge of environmental science and geoscience	Environmental science and geoscience	Environmental science and geoscience (content) Proficiency in knowledge

What is the coverage of indicator 4.1.1?

a. Number of countries

b. School-age population in millions

What is the coverage of other indicators?

Indicators	Methodological framework	Tools to measure (data source)	Coverage countries	Coverage population (%)
4.4.2	<u>Yes</u>		5	2
4.6.1	<u>Yes</u>	Skills' assessment surveys of the adult population (PIAAC)	7	3
4.7.4	<u>Yes</u>	ICCS	23	10
4.7.5	<u>Yes</u>	TIMSS, PISA	38	16

Questionnaires and data collected in CNAs serve to report non-cognitive indicators

Cognitive test	Test items (questions) for measuring learning outcomes
Student questionnaire	<ul style="list-style-type: none"> ▪ Basic demographic information (sex, age) ▪ Household and socio-economic background ▪ School-related experiences (including exposure to bullying) ▪ Learning-related experiences (classroom activities) ▪ Self-perceptions, interests and aspirations related to different subjects ▪ Use and proficiency of ICT
Teacher questionnaire	<ul style="list-style-type: none"> ▪ Demographic and background information (sex, age, years teaching, subjects taught) ▪ Qualifications and training ▪ Types of teaching practices used and challenges faced
School director questionnaire	<ul style="list-style-type: none"> ▪ Demographic and background information (sex, age, years of experience) ▪ Qualifications and education ▪ School characteristics ▪ Opinions about availability and adequacy of resources ▪ Management and governance ▪ Interaction with parents and school communities ▪ Challenges faced in teaching

Methodological challenges when reporting on SDG 4.1.1 and potential solutions

Challenges

- Comparability of grades and education levels, comparability between countries, and comparability over time
- Procedural quality is heterogenous among program assessments specially at the national level
- Low coverage of CNAs (specially in LIC and LMIC)
- Financial costs of assessments for countries
- Reporting comparable data on foundational learning

Solutions developed

1. Global Standards & harmonization tools

- Minimum Proficiency Level (MPL)
- Global Proficiency framework (GPF)
- Linking assessment programmes to the MPL:
 - *Assessments for Minimum Proficiency Levels (AMPL) that could be used along National or Regional assessments*
- Concordance between assessment programs:
 - *Rosetta Stone: between international (TIMS/PIRLS) and regional (PASEC and ERCE) assessments*

2. Menu of alternatives for country reporting

3. Capacity development tools

- Policy Linking
- Learning Toolkit

Agenda forward to work with Member States

Assessment Harmonization.

- Standardised blueprint is needed for evaluating assessments suitable for harmonization efforts. The proposed "Blueprint for Evaluating Assessments" provides a model.
- Context questionnaires enable disaggregation of data by student background to analyse inequalities. Systematic harmonisation of these questionnaires is an important next step.
- Data availability on learning outcomes remains uneven, especially for developing countries. Expanding quality assessment data globally is critical for SDG 4 monitoring.

Agenda forward to work with Member States

Developing Innovative Methodologies on indicators with low coverage

- in the context of SDGs 4.7.4 and 4.7.5, the exploration of an AMPL approach rooted in existing assessments, such as the IEA International Civic and Citizenship Study (ICCS), could present a viable avenue for consideration.
- advances in artificial intelligence present new opportunities to assess adult literacy and numeracy at scale by automating the analysis of available text and data sources.

Strengthening Stakeholder Collaboration and policy use

- Collaboration between international agencies, donors, academics and country teams is essential to strengthen measurement approaches while building national capacity.
- Beyond measurement, findings must inform policy and practice reforms that improve access to quality education and promote lifelong learning for all..

SDG Indicator framework

- ▶ **2015** Inter-Agency and Expert Group on Sustainable Development Goal Indicators (**IAEG**) established at 46th session of the Statistical Commission (UNSC)
- ▶ **2015** UN General Assembly [Resolution 70/1](#) mandated the **global indicator framework**, to be developed by the IAEG-SDG and agreed by UNSC by March 2016 foresee 2 revisions to be approved in March UNSC meeting in 2020 and 2025
- ▶ **2017** UNSC [Decision 47/101](#) agreed draft global indicator framework as practical starting point subject to future technical refinement
- ▶ **2017** Workplan for examining list of possible additional indicators and revision framework was approved in [ToRs of the IAEG-SDG](#)
- ▶ **2017** UN General Assembly [Resolution 71/313](#) adopted global indicator framework

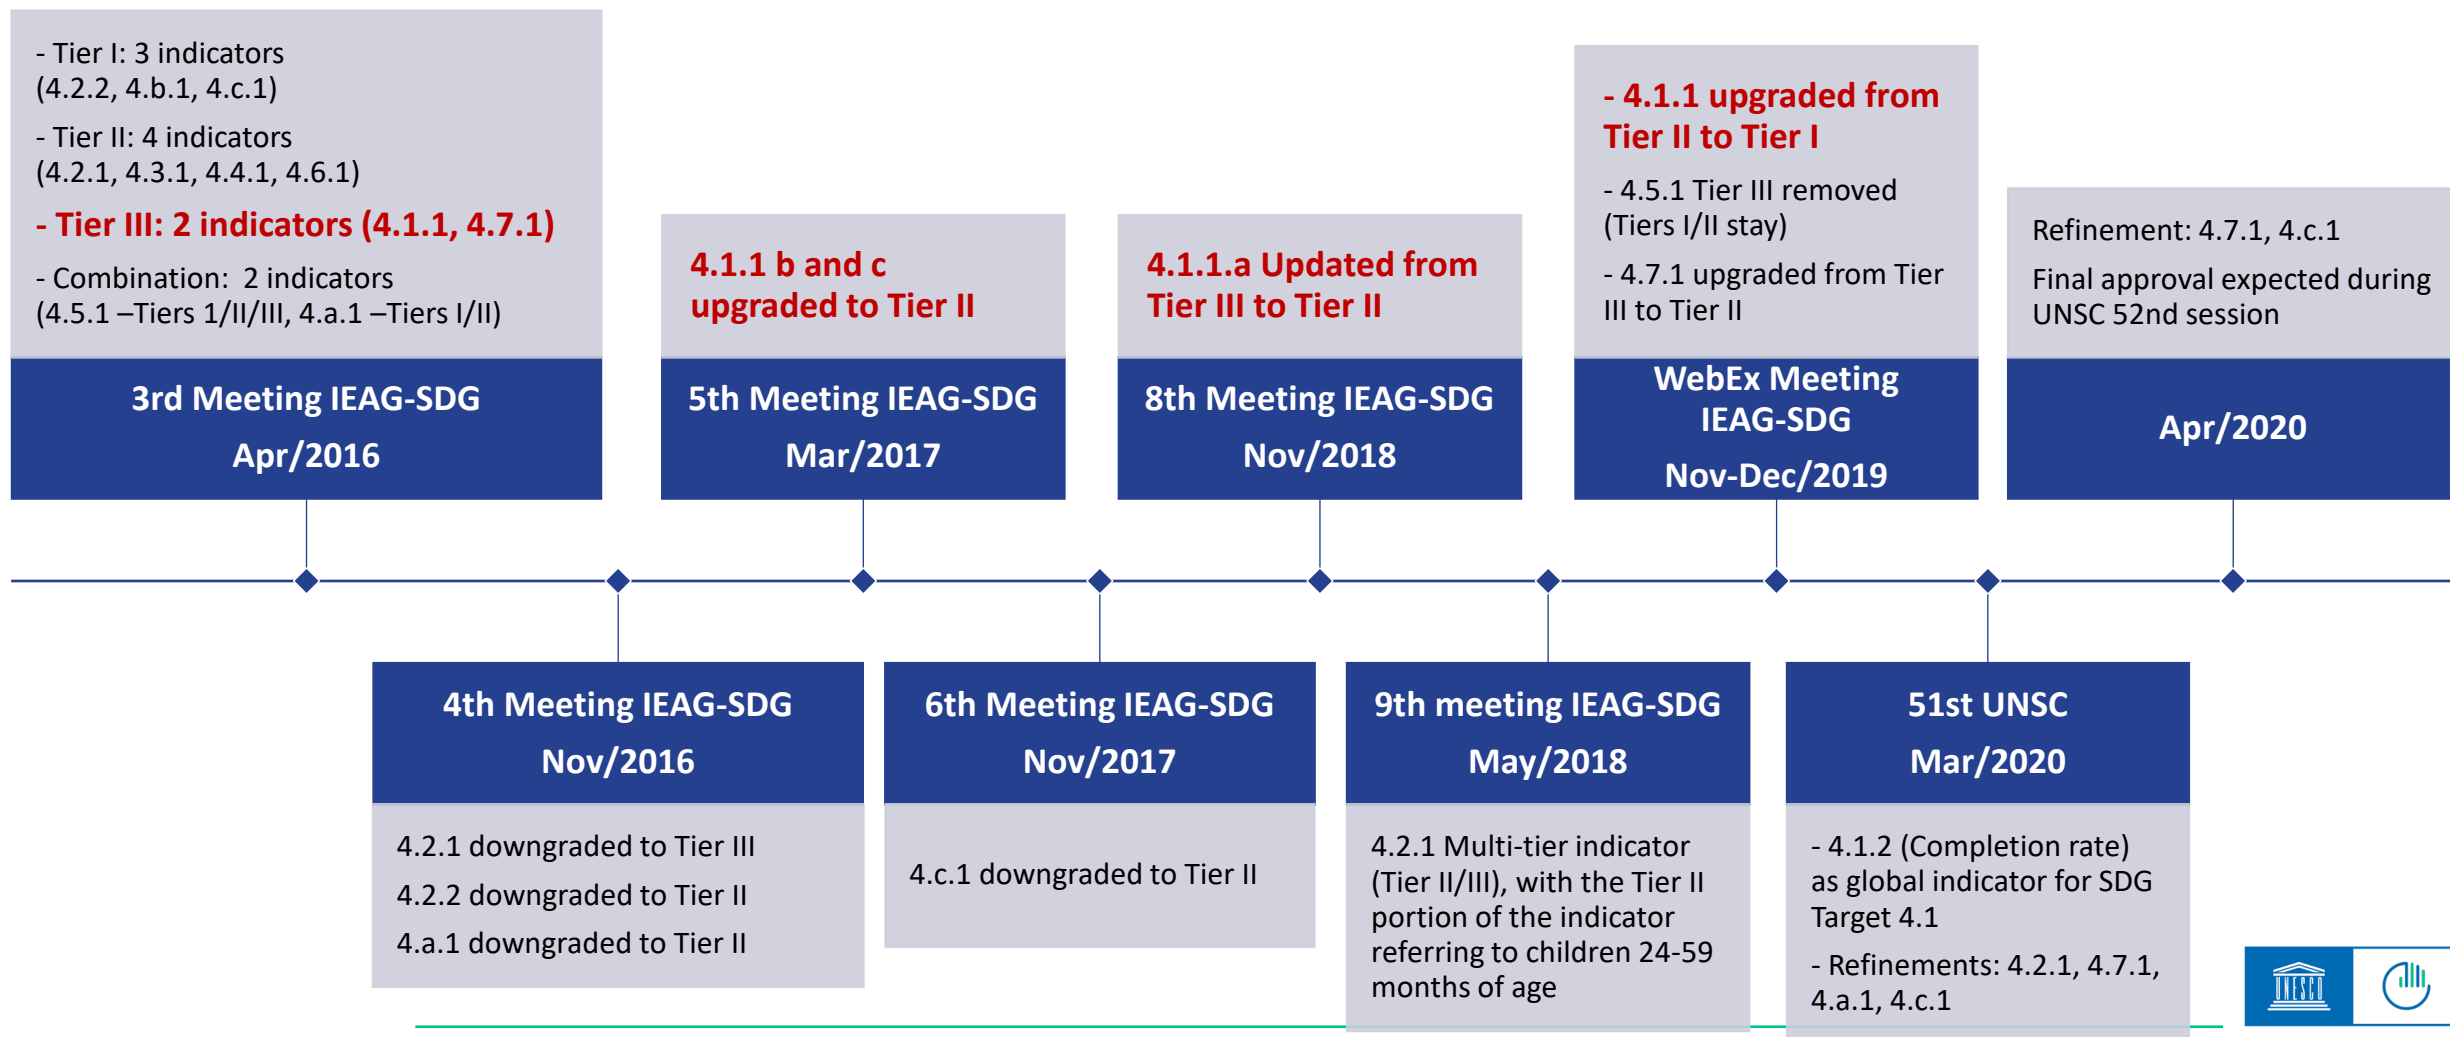

SDG Indicator framework - Timeline for 2020 and 2025 revisions

Process 2019-20	
July-August	Consultation and evaluation
October	IAEG-SDG meeting to review agenda and decide status
November	UNSC submission
March (following year)	Adoption

► **2025 revision**
Will follow the same calendar

SDG 4 indicator framework: Up to 2020

SDG Indicator framework (2025 revision)

- All indicators in Tier II to be evaluated based on (i) information provided so far and (ii) judgement about their feasibility; potentially consulted in late June/early July
- Data plan to address coverage is required (although not clear how much this matters); indicator 4.1.1a might be downgraded
- Decision based on objective criteria that is coverage (no Tier III indicator are in this phase)
- Replacement will be proposed if the deleted indicator is the only indicator monitoring the corresponding target (e.g., 4.6.1)

 @UNESCOstat

SDG 4 indicator framework (4.1.1)

- ▶ **September 2018 MPL adopted**, and proficiency level of each assessment identified; with respect to FLM/PAL/EGRA, the meeting concluded that:
 - ▷ Some tools were misaligned with MPL in content and coverage
 - ▷ Basic documentation was not available (blueprint, microdata, technical reports)
 - ▷ Sampling frame and post-sampling treatment were not adequate/nor informed

- ▶ Since then:
 - ▷ Virtual meeting to identify alignment of ICAN policy linking (early 2020)
 - ▷ Bilateral meetings with ACER (UIS technical partner) on UNICEF AMPL-based 4.1.1b tool

- ▶ **Up to 2022** Reporting is based on an **interim** period to adapt the tools

- ▶ **Since 2022** Reporting is based on **aligned tools**
 - ▷ Content alignment
 - ▷ Procedural alignment
 - ▷ Representative sample
 - ▷ **Government approval**
